

**Part Number M8009
LED DIGITAL CLOCK**

Instructions

WIRING INSTRUCTIONS

Connect the **BLACK** ground wire directly to the engine block.

Connect the **RED** wire to a switched +12 volt source (ignition switch).

Connect the **PURPLE** wire to the headlight switch to dim the LEDs 50% when the headlights are on. However, do not connect to the dash light dimming rheostat control wire – the dimming feature will not work properly. Connect the **PURPLE** wire to ground for permanent, maximum brightness.

Connect the **ORANGE** wire directly to the battery so that it retains time when they key is shut off.

Once the gauge is wired, program time with two separate push buttons for hour and minute settings.
